

Secure Remote Access Solutions

Access your system remotely and securely without worrying about unwanted guests.

Novaspect's Secure Remote Access Solution (SRA) allows you to utilize full function operator and engineering sessions from locations remote to the control system. Full operator interface, configuration, and troubleshooting capabilities can be provided to remote locations with the same fidelity as if they are on a direct connection to the control system. Additional process DMZ firewalls and jump servers add layers of protection to your remote connections to maintain the security of your control system.

KEY COMPONENTS

- **Remote Desktop Server** hosts remote desktop session to your industrial control system.
- **Control system perimeter firewall** and DMZ jump server provide layers of protection.
- **Multifactor authentication** can be added as an additional layer of protection.

Cybersecurity Packages

ADVANCED

- Firewall provided to establish Control System Perimeter network (L2.5)
- Remote desktop jump server / gateway provided for DMZ
 - Can be joined to existing customer DMZ domain

PREMIUM

All advanced features, plus:

- Firewall provided to establish Control System Perimeter network (L2.5)
- DMZ Virtual infrastructure
 - DMZ Domain Controller
 - RD Gateway
 - Certificate Authority
- MFA optional for DMZ domain
