

Cyber Assessment & Vulnerability Scanning

Better understand your system's security compliance and maintain best practices through scanning and reporting, with guidance for making improvements.

The Novaspect Cyber Assessment & Vulnerability Scanning solution assesses the Cybersecurity state of OT systems to discover potential vulnerabilities and provide specific recommendations to help keep OT systems secure.

The Core Cybersecurity Assessment compares an industrial control system against Industry recommended best practices such as IEC/ISA 62443, determining areas for improvement.

KEY COMPONENTS

- **Three-step assessment process**, includes initial field service consultation and data collection, report generation and analysis, plus presentation of findings.
- **Detailed Core Cybersecurity Report** is an in-depth presentation of findings to the Customer site team.
- **Support** in delivering the cybersecurity report to management. Includes a consultative presentation, providing rationale for releasing funds towards improving the security of a system.

Cybersecurity Packages

CORE

- Basic Cyber Assessment & Report
