Site Policies and Procedures Development

Limit cyber-breaches and reduce plant down time by fine-tuning your defense strategy.

NOVASPECT

Novaspect's Site Policies and Procedures Development services provide our customers with a toolkit of documentation that can help their organization align with IEC 62443 recommendations in their plant. Having a plan written down and trained into the team will improve the overall security of the site and provide proof to the organizations leadership that their site is following best practices.

Cybersecurity Packages

PREMIUM
- Review existing documentation and practices
- Host multiple consultation meetings on best practices and provide IEC 62443 learnings
- Develop new standards and policies for the site
- Train and implement new standards and policies with key stakeholders at the plant
- Twice year review of existing standards and policies. Update standards and policies to reflect changes in best practices and retrain the site team as needed.

SCOPE OF SERVICE
- A typical engagement ranges from one to four weeks depending on the number of policies and procedures involved.
- Investigations with a large number of policies and procedures may require more time. During the review and development phase, we collaborate closely with your security team, process control team, legal and compliance teams, among others.
- At the completion of the review and development phase, a comprehensive report of findings as well as the new or revised policies and procedures manual will be delivered.

Protect your process control system and network against potential threats
