

# The Automation Advantage: Control Panels and Enclosures

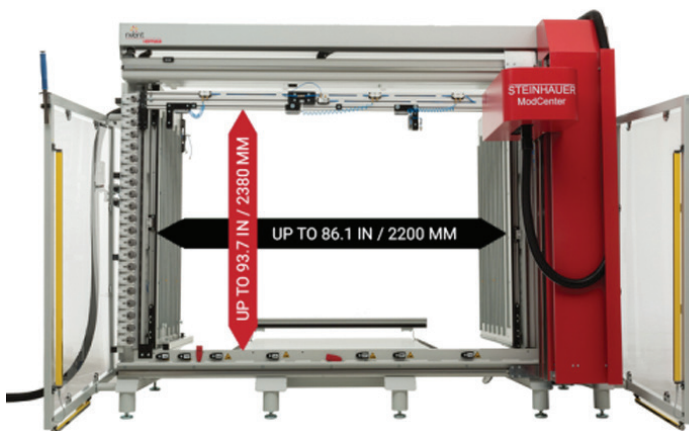

## CNC Machining Capabilities

Novaspect can automate the traditionally labor-intensive control panel and enclosure construction and modification process to achieve the expected level of precision, consistency, and cost-effectiveness. Our specialized CNC Machine can deliver a higher-quality product in significantly shorter lead time versus manual fabrication.

## How will Automation Benefit Your Operation?

- Faster production and efficiency rates, leading to shorter lead and turnaround times
- Flexibility to modify a wide range of enclosures and control panel sizes up to 93.7 inches in height and 86 inches in width
- Improved product quality through precision
- Ability to utilize your custom schematics, P&IDs and engineered documents to meet fabrication requirements

## Notable Features & Capabilities

- Precisely measures, drills, mills, taps etches and more
- Capable of cutting a variety of materials
- Accurate and rapid material processing
- Consistency in specified cutout reproductions
