

Backup and Recovery

Verified, tested backups are a critical piece of any cybersecurity plan.

The **Novaspect Backup & Recovery solution** enables users to easily back up and recover their critical files, databases, and system images while providing disaster recovery and data protection solutions.

Utilizing the latest vendor supported software this delivers a best-in-class solution for DeltaV systems, AMS Suite, and other DCS, SCADA or PLC environments.

KEY COMPONENTS

- **Agent for Windows** enables disk-level and file-level data protection under Windows.
- **Deduplication** minimizes storage usage by eliminating data repetition and storing identical data only once.
- **Backup & Recovery Management Server** is the central server that drives data protection within the enterprise network.
- **Onsite and Offsite Backups** provide access to data in need of recovery.

Cybersecurity Packages

CORE

- Design and installation of an onsite backup and recovery server
- Scheduled automatic backups of critical system files
- Scheduled automatic image backups of critical servers and workstations
- Yearly testing of critical system files and system images to ensure backups are in a healthy state for recovery

ADVANCED (WITH REPLICA SERVER)

All core BnR features, plus:

- Twice yearly testing of critical system files and system images to ensure backups are in a healthy state for recovery
- Configuration of an “off-site” backup and recovery server

PREMIUM (WITH CLOUD REPLICA)

All core and advanced BnR features, plus:

- Automatic replication of backups to an offsite server maintained by Novaspect
- Servers and workstations can be recovered from any Novaspect office and sent to site in the event of machine failure
