

Patch Management

Easily patch systems, workstations, and embedded nodes on a routine basis with no unplanned downtime.

The **Novaspect Patch Management solution** provides patch management for your OT system that automates the installation of approved software updates to your Industrial Control System vendor.

KEY COMPONENTS

- **Monthly Cumulative Updates, Servicing Stack Updates, and Other Updates** for current Windows environments.
- **Security Updates** for current Microsoft Office.
- **Conference call** to review scope of work and site requirements and verification of Guardian registration file.
- **Review** of approved MS Security Updates, Virus Scanner DAT file and Guardian Hotfixes based on the requirement for your Industrial Control System.
- **On-site installation** of approved MS updates, DAT file and Hotfixes (as applicable).
- **SIS components** (online safety systems) are not included, as depending on the update a system proof test may need to be re-done.
- **Run registration file** and upload to vendor if required.

Cybersecurity Packages

CORE

- A Novaspect specialist will provide on-site installation of available Microsoft (MS) security updates, update Virus Scanner DAT file, and install appropriate DeltaV Hotfixes quarterly

ADVANCED

All core features, plus:

- Software and security updates for DeltaV software, antivirus software, and Microsoft SQL Server
- Content Server updates to handle apply all approved updates and upgrade packages
- Novaspect will also provide an engineer to design the deployment of the integrated patch management software and will train your staff to properly maintain updates once configured

PREMIUM

All core and advanced features, plus:

- Onsite Novaspect engineer once per month to deploy the latest patches, ensure the system is healthy, and publish a report to confirm all applicable patches have been applied. No assistance from onsite personnel needed.
