The Better Alternative:

Enardo™ 2500 Series Tank Vent Emergency Relief Vents with Vacuum

Enardo Series 2500 Emergency Relief Vents with Vacuum provide an emergency pressure relief opening for storage tanks when exposed to overpressures not handled by standard tank vents. When properly sized, this vent provides the capacity meet API Standard 2000 NFPA 30 and OSHA (29 CFR 1910.106) for emergency venting due to fire exposure, and offers high-capacity vacuum flow for emergency pump-out of product. The Series 2500 also provides quick, easy access for tank inspection and maintenance.

FEATURES:

- Advanced seal technology exceeds the most stringent industrial standards for allowable leakage (1 SCFH at 90% set point) and provides excellent set point accuracy (+/- 3%).
- Every Enardo 2500 Series vent is factory inspected, leak-checked, and certified.
- Corrosion-resistant coatings are available for even the most corrosive applications.
- Certified flow capacity curves are available for full product size range.
